A MENTOR

The close bond between Ahsoka Tano and Anakin Skywalker reminds Aayla of her own relationship with her former Master Quinlan Vos. When Anakin is badly hurt, Aayla tries to teach Ahsoka to control her emotions: a Jedi can't endanger many lives in trying to save the life of one special person.

B1 BATTLE DROIDS ARE THE soldiers of the Separatists – simple, sturdy machines built by the billions in secret factories and dispatched to attack planets loyal to the Galactic Republic. Clone troopers dismiss battle droids as “clankers”, but many have died under their guns.

Battle droid commanders enjoy reminding lesser B1s of their superior rank, but when Jedi or clones are on the loose, they actually hope a tactical droid or other leader will take charge.

TWI'LEK WARRIORS HAVE LONG ridden blurrs into battle, controlling these fierce steeds with nudges of knees and flicks of reins. They can run as quickly as an AT-RT, and Mace Windu and Cham Syndulla rely on them in their attempt to retake Lessu from the Separatists.

ARF troopers such as Razor and Stak often begin their training as AT-RT pilots by learning to ride living mounts. Cham Syndulla's Twi'leks lend the unlucky trooper a spare blurr, challenging him to demonstrate his skills in the saddle.

CLONE TROOPER CC-5052, known as Commander Bly, serves with the 327th Star Corps, led by Aayla Secura. He has formed a bond with his Jedi general, and numerous battles have given the 327th a reputation for courage while under Separatist fire.

A GUN-TOTING BOUNTY HUNTER FROM Duro, ruthless Cad Bane doesn't care what he's asked to do or who asks him to do it – he will do anything as long as he gets the credits that seem to be the only thing in the galaxy he loves.

Clone troopers spend their lives surrounded by fellow soldiers with their own face and they develop strong bonds that make them very effective in battle. However, they have been trained to complete missions at all costs and accept that many of them will die in combat.

ROCKET BATTLE DROIDS are modified with a jetpack to move through space. Grievous dispatches them to hunt survivors of the *Triumphant*, find their escape pods and cut them open so the men die in space.

It's a task the droids take to with chilling enthusiasm.

TRENCH WAS BELIEVED killed at the Battle of Malastare Narrows, but the eight-limbed alien admiral survived. The mere sight of his deadly Breadnaught, *Invincible*, is enough to fill veteran Republic officers with fear.

A WORTHY OPPONENT

At Christophsis, Trench traps Bail Organa on the surface and waits for the Republic to rescue him. He is delighted when Anakin Skywalker enters the battle in a stealth ship. It's been so long since Trench got to face a worthy adversary.

TUCKER
RYLOTH FLIGHT

DEADLY BEAUTY

The other pilots in Blue Squadron think Tucker is a bit crazy for saying so, but he has always found space combat beautiful: Starfighters spin and whirl as they jockey for position, lit by colourful flashes of explosions and laser fire. All the same, at Ryloth, Tucker wishes he were watching from farther away.

ONE OF HONDO OHNAKA'S lieutenants, Turk Falso has never liked taking orders from his pirate boss. When a rich shipment of spice arrives from the Republic, Turk sees a chance to make his own fortune. And he might have succeeded, if not for the interference of a meddling Gungan.

TURK FALSO

BAD LIEUTENANT

A THIEF'S HONOUR

Turk decides to take a chance at a fortune when Hondo sends him to escort the Republic shuttle carrying spice to ransom Count Dooku. On Turk's orders, Barb Mentir shoots the ship down instead, and Turk heads for the crash site on a speeder bike with several other thugs. Today is payday!

UNDEAD GEONOSIAN

THESE FEARED KILLING MACHINES can patrol on their scissor-like legs, then take flight and become starfighters that swarm Republic pilots. They are controlled by the central computers of Separatist Droid Control Ships, which launch hordes of them at nearby foes.

A NUMBERS GAME

An individual droid starfighter is no match for even a rookie clone pilot – the droids' attack patterns are predictable and unimaginative. But rarely does a pilot encounter just one vulture droid: Separatist ships launch them in vast waves, and those attack patterns form a dense, deadly web of laser blasts that even the best pilot can't escape for very long.

TEE WATT KAA'S SON, Wag Too, rebels against his father's pacifism, demanding to know why the Lurmen can't defend their homes against the forces of Lok Durd. When it appears his village will be overrun, he goes on the offensive.

A HEALER LIVES HERE

BAD MANNERS

Obi-Wan Kenobi seems so civilised that Whorm agrees to discuss his surrender over a cup of tarine tea: there's no reason why enemies on the battlefield must act like savages once the shooting stops. But Kenobi is stalling, and he turns the tables on Whorm. How uncivilised!

ON THE BRIDGE

At the centre of a Republic warship's bridge is her captain, who should remain cool and calm even if men are dying around him. Yularen's father taught him that, and the admiral considers it his duty to pass on the lesson to any officer who serves alongside him.
